SOI IT Lecture Package

- 10 Lectures
 - Internet Week 98, 99, 2000, 2001
- 3 Lectures
 - Special lectures by

Fred Baker
(Cisco Systems)

Vinton Cerf
(MCI Worldcom)

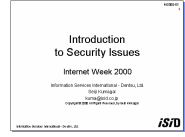

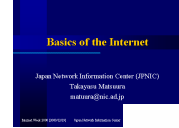

Jawad Khaki
(Microsoft)

Title of lectures

- PKG#1
 - Introduction to Internet
 - Introduction to Routing Protocol
 - Introduction to Internet Security
 - Introduction to Domain Name and IP address
 - Introduction to IPv6
 - DNS and Mail
 - Internet Architecture
 - + 3 Special Lectures
- PKG#2
 - Details of Protocol
 - Mail Server Construction
 - Routing Control for Large-scale Networks

Contents (sample)

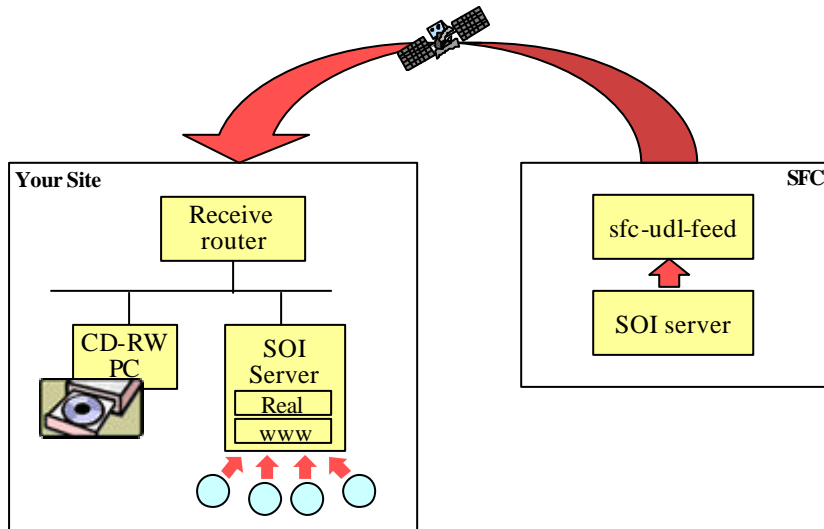

The screenshot shows a presentation slide titled "An example of newspaper model". The diagram illustrates a flow from a newspaper company to a customer. The newspaper company has a "create the article" step, which leads to a "Regular/Sport" category. This category is then handled by a "deliveryman" (worker) using a "bike/bicycle" (transporter) along a "street" (path). The customer then "reads the article", which also falls under the "Regular/Sport" category, handled by another "deliveryman" (worker) using a "bike/bicycle" (transporter) along a "street" (path). The diagram uses various colors and arrows to show the flow and relationships between these elements.

Below the diagram, there are two yellow callout boxes:

- Subtitle in English
- Materials in English

Text below the slide: "The Audio of some lectures is translated into English."

How to get the contents

How to setup the contents

Receive Router

```
> cd /home/soi/recv/  
> ls 01/  
  01.pdf          01.tar.gz        04.rm  
> scp -r 01www.unsrat.soi.wide.ad.jp /soi/soi/pkg1/
```

- Go to the directory where the contents are sent.
- Copy the contents to SOI server.

SOI Server

```
> cd /soi/soi/pkg1/01  
> ls  
  01.pdf          01.tar.gz        04.rm  
> tar zxvfp 01.tar.gz  
> /soi/soi/util/change_smil_mcast.pl
```

- Go to the directory to /soi/soi/pkg1.
- Extract files from tar.gz.
- Setup the contents with special script.
